SUMMARY

As a BCA graduate currently pursuing MCA, I aim to build a successful career in the software development field. I am passionate about web technologies and committed to learning new tools and frameworks. My goal is to contribute to innovative projects, enhance user experience, and grow as a full-stack or backend developer in a dynamic organization.

PROJECTS

Vehicle Management System with AI Assistant

Built a web-based system to manage vehicle data, maintenance schedules, and driver assignments. Integrated an AI assistant for voice/text commands to fetch vehicle info, set reminders, and generate reports. Tech stack: React.js, Node.js, MongoDB, OpenAI API.

Online bus ticket reservation system

Developed an online bus ticket reservation system using PHP, Bootstrap, HTML, and CSS. The project featured user account management with authentication and profile management, along with a booking module allowing users to search for routes, view available buses, and reserve tickets. Emphasized an engaging user experience with a responsive UI, enabling users to easily navigate the system and complete their bookings efficiently.
